

1. Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Device Category	Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and color projects
Printer	Laser Printer	Printing office documents in large quantities
Printer	Dot Matrix Printer	Printing invoices and bills in shops
Scanner	Flatbed Scanner	Scanning certificates and photographs
Scanner	Sheet-fed Scanner	Scanning multiple pages into a PDF
Webcam	Built-in Webcam	Attending online classes on a laptop
Webcam	External USB Webcam	Video conferencing and online meetings

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage.

Hint: Think about speed, convenience, and compatibility.

Connection Interface	Advantage	Disadvantage
USB	Fast and stable connection	Requires a cable and short distance
Wi-Fi	Wireless and convenient	Depends on network quality
Bluetooth	Easy to connect without cables	Slower speed and limited range

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

Device: Home Wi-Fi Printer

Steps:

1. Plug the printer into a power outlet and turn it on.
2. Make sure the printer and computer are connected to the same Wi-Fi network.
3. On the printer screen, open **Settings** → **Network** → **Wi-Fi Setup**.
4. Select your Wi-Fi network name.
5. Enter the Wi-Fi password and connect the printer.
6. On the computer, open **Settings** → **Bluetooth & Devices** → **Printers & Scanners**.
7. Click **Add Device**.
8. Select the printer from the list.
9. Install the printer drivers if prompted.
10. Print a test page to verify the setup.

Wireless Method Used: Wi-Fi

Setup Requirement: Both devices must be connected to the same Wi-Fi network.
